

OnEasy Agents

AI-powered platform for instant Indian business document generation.

What It Is

OnEasy Agents is a web app where business owners and professionals in India can generate official business documents in under 5 minutes — without hiring a chartered accountant or lawyer.

Users log in with their phone number, pick a document type, fill a guided form (with an AI assistant helping along the way), pay a small fee, and instantly download a ready-to-use PDF.

Think of it as a "**Canva for business paperwork**" — except instead of designing things, the AI drafts legally formatted documents for you.

Who It's For

Small business owners, founders, partners, employers, and freelancers in India who need:

- A **net worth certificate** for a tender, visa, or loan application
- A **partnership deed** when starting a business with co-founders
- An **LLP agreement** when registering a Limited Liability Partnership
- An **offer letter** for new hires
- A **salary slip** with proper Indian tax calculations (HRA, PF, ESI, TDS)

These documents normally cost **2,000 to 10,000 rupees** from a CA and take **3 to 7 days**. OnEasy delivers them in **5 minutes for a few hundred rupees**.

The 5 Document Generators ("Agents")

#	Agent	What It Does
1	Net Worth Certificate	Calculates assets minus liabilities and generates a CA-style certificate
2	Partnership Deed	Drafts a full partnership agreement with all legal clauses
3	LLP Agreement	Generates an MCA-compliant Limited Liability Partnership agreement
4	Offer Letter	Creates professional employment offer letters for HR teams
5	Salary Calculator	Computes salary breakups and generates payslips

Each agent has the same layout: an **AI chat assistant** on one side and a **form** on the other. The AI guides the user through unfamiliar fields, and on submit, the server generates a downloadable PDF.

How a User Uses It

1. Lands on the marketing site
2. Logs in with phone number (OTP via SMS)
3. Picks an agent from the dashboard
4. Fills out the form (AI assistant helps when stuck)
5. Pays via UPI, card, or net banking
6. Downloads the generated PDF
7. Returns anytime to view document history

Tech Stack

Frontend

Tool	Purpose
Next.js 15	React framework powering pages and API routes
TypeScript	Type-safe JavaScript for fewer bugs
Tailwind CSS	Utility-first styling
Lucide Icons	Icon set used throughout the UI

Backend & Database

Tool	Purpose
Supabase	Authentication, Postgres database, and file storage in one
PostgreSQL	Underlying SQL database (managed by Supabase)
Row-Level Security (RLS)	Ensures each user can only access their own data

AI

Tool	Purpose
Google Gemini	Powers the chat assistants and AI-generated document content

Payments and Communication

Tool	Purpose
Razorpay	Payment gateway (UPI, cards, net banking)
MSG91	Sends OTP SMS for phone-based login

Infrastructure

Tool	Purpose
Vercel	Hosts the website with auto-deploys from GitHub
GitHub	Source code and version control
Upstash Redis	Rate limiting to prevent AI abuse and runaway costs
Custom domain	getnetworthcertificate.com

PDF Generation

Server-side PDF rendering with proper Indian formatting:

- Times New Roman for legal documents
- Calibri for offer letters
- A4 page size with regulated margins
- Custom signatures, stamps, and headers

Project Architecture

It is a **monorepo** — one Next.js project containing all 5 agents under separate routes.

```
oneasy-agents/
├─ /                → Marketing landing page
├─ /login           → Phone OTP login
├─ /dashboard       → User's home after login
├─ /networth        → Net worth certificate generator
├─ /partnership     → Partnership deed generator
├─ /llp             → LLP agreement generator
├─ /offer-letter    → Offer letter generator
└─ /salary          → Salary calculator
```

Each agent was originally built as a standalone project, then merged into this single app while keeping each agent's original UI intact.

Why It Stands Out

Traditional Way	OnEasy Way
3 to 7 days turnaround	5 minutes
2,000 to 10,000 rupees	Couple of hundred rupees
Office hours only	24/7 self-service
Confusing legal jargon	AI explains every field
Manual back-and-forth with a CA	Fully automated

Production Hardening

The app includes production-grade infrastructure:

- **Security:** Content Security Policy, security headers, CORS protection, OTP rate limiting
- **Cost control:** Daily AI usage caps per user (prevents runaway Gemini costs)
- **Database:** Soft deletes, indexes, audit logs
- **SEO:** Full metadata, sitemap, robots.txt, OpenGraph images, JSON-LD structured data
- **Compliance:** All documents follow MCA, Income Tax, and GST standards

Summary

OnEasy Agents is a SaaS product for Indian business document generation, built on modern web technology (Next.js, Supabase, Gemini AI), hosted on Vercel, with payments through Razorpay. It replaces the slow, expensive process of hiring professionals with a 5-minute self-service flow that produces the same quality output.
